PROFESSIONAL PARTS PARTNER

TA-Falz

TA-Falz colored aluminum in seam quality is an aluminum semi-finished product in strip form whose alloy, strength and coating system have been specially adapted for use in plumbing technology. This makes TA-Falz ideal for all applications in seam technology.

The coil-coated aluminum strips can be roll formed, cutted, sawed, folded, edged, rounded, drilled, riveted and glued without any problems. TA-Falz can be individually combined with other materials such as wood, glass or steel.

From curved arched roofs to narrow-angled dormers or bay windows, from church spires to large-surface facade cladding – TA-Falz offers many possibilities for individual roof and facade design.

TA-Falz offers architects, processors and building owners a wide range of sophisticated design options combined with simple and inexpensive processing.

Alloy

ENAW 3105

Fire protection

A1, non combustible

Surface

Front	PE, PVDF 25 µm on one or both sides Two-coat (primer + topcoat)
Back	Protective lacquer 5-7 µm
Protective film	Laser-foil black-and-white 80 µm on one or both sides

Coils

Thickness	0,7 mm
Weight	60 - 1.000 kg
Width	500 mm 600 mm 1.000 mm 1.250 mm

Sheets

Thickness	0,7 mm - 1,5 mm
Dimensions	1.000 x 2.000 mm 1.000 x 3.000 mm 1.250 x 2.000 mm 1.250 x 3.000 mm Special formats and cuts on request
