New from our Metal Service Center

Talix Aluminium foil

Talix aluminium foil is extremely heat-resistant and withstands temperatures of up to 300°C without mechanical stress. This makes it ideal as a vapor barrier for industrial insulation or as sheathing for trace heating systems. Available in thicknesses from 0.03 to 0.10 mm and in various lengths and widths (see table), Talix aluminium foil offers you maximum flexibility.

Article overview:

Talix Aluminium foil smooth, soft

Article	Thickness/ mm	Width/ mm	Length/ m
